Chemistry

Organic Chemistry
Principles

Calendar cleanup/update.

...pts of modern chemistry, its
...ication to biological processes and everyday life,
...inciples of bonding/structure/stereochemistry, and
...reaction mechanisms will be presented. Their
...application to all of the main functional
...groups and biologically important substances will

A consideration of basic principals of the atom including body imaging techniques followed by a general summary of organic chemistry, its application to biological processes and everyday life, including principles of bonding, structure and stereochemistry. Some physical chemistry will be given as it relates to the properties of air and breathing.
